PPDIOO (Prepare, Plan, Design, Implement, Operate, and Optimize) is the network life cycle that is defined by Cisco. PPDIOO has the six phases or steps for designing a network and these design phases are as following:

Cisco PPDIOO | A Network Life Cycle - Networking ...

In the modern world of computer networks, there are many moving parts that must be carefully controlled in order to get the most out of them. One of the methods that can be used to provide this is by following a network lifecycle; these lifecycles define an approach that can be followed for each stage of the network's life. Cisco's version of this is the PPDIOO lifecycle, which stands for "Prepare, Plan, Design, Implement, Operate and Optimize."

To structure the project of designing and maintaining a network, Cisco divided PPDIIO into phases. Since we are talking about a lifecycle, phases repeat themselves in a circular loop. Cisco PPDIIO is a lifecycle that repeats over time. We will dive into each phase in detail later, but for now, here is a quick explanation.

Introducing Cisco PPDIIO for Network Design

Prepare, Plan, Design, Implement, Operate, and Optimize (PPDIIO): PPDIIO is a lifecycle method that Cisco uses for network management. Following this lifecycle management process assists in lessening the total cost of ownership for the network, increasing network availability, and improving agility to make changes to the network structure.

CISCO's PPDIIO Cisco also has their own network service lifecycle guidelines that loosely map to ITIL standards. PPDIIO service lifecycle allows network design engineers and network planners to better manage large network installations. Cisco created this methodology to allow network engineers to better plan and meet business objectives.

Managing a Large Network Installation Using ITIL and PPDIIO

After selecting the network design methodology, you need to design your network topology. You can use the top-down design approach for designing the network topology. Top-down design just means starting your design from the top layer of the OSI model and working your way down.
