Human Behavior in the Social Environment

A Macro, National, and International Perspective *SAGE*

Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled *Human Behavior in*

the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social environment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for

recommended reading, chapter summaries, and flash cards

Human Behavior and the Social Environment, Macro Level

Groups, Communities, and Organizations *Oxford University Press*

A timely revision in this global age, Human Behavior and the Social Environment, Macro Level develops a sophisticated and

original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. * Integrates up-to-date research findings, models, and government statistics * Enhanced discussions of theory, group dynamics, family, community, and the environment * Theoretical concepts and practice implications in each chapter * Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior * Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives * Focuses on evidence-based theory and research * Teaches from a global, cross-cultural, perspective, highlighting themes of empowerment and

social justice * Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic * Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE/ Don't miss the companion volume, *Human Behavior and the Social Environment, Micro Level, Second Edition*, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.

motivations, and revealing the myriad patterns and paradoxes of our behaviour in the social context.

Theories of Macro-Organizational Behavior: A Handbook of Ideas and Explanations

A Handbook of Ideas and Explanations *Routledge*

This book provides a comprehensive summary of the major theories meant to explain the way business and other organizations work, why they look and act as they do, and what makes some succeed and others fail. Among the many different approaches to the subject, no one school of thought accurately reflects current thinking on these issues. The author presents a much-needed overview of thirty of the major theories that underpin Organization Theory and Economic Organization. Each theory is summarized in a stand-alone fashion, allowing each chapter to be used either in complement or as a separate perspective. Integration of the various topics and perspectives is accomplished within section introductions and in the overall introduction and conclusion to the text. The goal of this book is to inform students of the main issues confronting organizations, the main theoretical ideas within the different paradigms, why it is important to theorize about organizations, how these theories are constructed, and how learning is improved by scanning multiple perspectives. It can be used as a stand-alone course text or supplementary text for advanced undergraduate or graduate courses in Organization Theory.

Macro Cultural Psychology

A Political Philosophy of Mind *Oxford University Press*

This book articulates a bold, new, systematic theory of psychology, culture, and their interrelation. It explains how macro cultural factors -- social institutions, cultural artifacts, and cultural concepts -- are the cornerstones of society and how they form the origins and characteristics of psychological phenomena. This theory is used to explain the diversity of psychological phenomena such as emotions, self, intelligence, sexuality, memory, reasoning, perception, developmental processes, and mental illness. Ratner draws upon Lev Vygotsky's sociocultural psychology, Bronfenbrenner's ecological psychology, as well as work in sociology, anthropology, history, and geography, to explore the political implications and assumptions of psychological theories regarding social policy and reform. The theory outlined here addresses current theoretical and political issues such as agency, realism, objectivity, subjectivism, structuralism, postmodernism, and multiculturalism. In this sense, the book articulates a systematic political philosophy of mind to examine numerous approaches to psychology, including indigenous psychology, cross-cultural psychology, activity theory, discourse analysis, mainstream psychology, and evolutionary psychology.

Macro Practice in Social Work for the 21st Century *SAGE*

Inspires students by tracing the careers of macro practitioners from grass roots organizers to agency executives "A truly amazing book. It manages, as few have before, to cross over as both a textbook and a brilliant contribution to contemporary social work practice. As a textbook it's perfect for macro methods and community organizing courses. It's packed filled with wisdom, insight, and experience, all delivered with grace, clarity, and commitment. -Robert Fisher, University of Connecticut "Steve Burghardt makes macro practice and community organizing come alive. Instead of turning this important part of social work into a dry series of academic abstractions he shows the reader the wonderful and exciting opportunities that exist. He

has inspired us to get out there and make change and help build our skills to effectively do so." -Mike Eichler, San Diego State University "This book provides a holistic vision for macro practice in the early 21st century. It argues very convincingly that effective macro practice requires a strategic vision, grounded in values, that integrates personal and community transformation. Burghardt provides a compass, as well as other tools, that macro practitioners can use to make significant social change. It promises to be a very useful resource for community and organizational practice in a number of fields." —Lorraine Gutierrez, University of Michigan "Building upon his influential work on the professional and personal dimensions of organizing in *The Other Side of Organizing*, Burghardt articulates an innovative framework for macro practice that is mindful of current and future local, national and global economic, social and political trends. With an emphasis on capacity building from the bottom up, this book offers a challenging, yet practical, approach to justice-centered practice." —Cheryl Hyde, Temple University This book develops a new paradigm suited to the quickly shifting dynamics of a globalized society, both more reliant on social networking, and yet seeking common connection and community. By focusing on how practitioners can make meaningful, strategic choices regardless of their formal roles and responsibilities, the author breathes new life into key issues ranging from how to respond to both diversity and oppression, the vital use of the internet for organizing and the limits to "virtual trust," and co-leadership development. This text is appropriate for upper-level undergraduate and graduate-level students enrolled in courses such as Macro Practice, Community Organizing, Leadership, and

Management/Administration in social work and allied departments.

Human Behavior and the Social Environment, Macro Level

Groups, Communities, and Organizations *Oxford University Press*

A timely revision in this global age, *Human Behavior and the Social Environment, Macro Level* develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. * Integrates up-to-date research findings, models, and government

statistics * Enhanced discussions of theory, group dynamics, family, community, and the environment * Theoretical concepts and practice implications in each chapter * Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior * Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives * Focuses on evidence-based theory and research * Teaches from a global, cross-cultural, perspective, highlighting themes of empowerment and social justice * Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic * Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE/ Don't miss the companion volume, *Human Behavior and the Social Environment, Micro Level, Second Edition*, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.

Handbook of Human Behavior and the Social Environment

A Practice-Based Approach *Routledge*

Handbook of Human Behaviour and the Social Environment is a compendium of new theories for all aspects of social work practice. It pulls together major theories and concepts used in the field. By synthesizing this wide knowledge base via practical points of view and tracing the socio-historical evolution of its content and the role of the social worker, this handbook will

assist social workers in achieving their primary goals: fostering human well-being and competent social functioning. The authors describe the current social work curriculum developed by the Council on Social Work Education Commission on Educational Policy and Accreditation Standards, demonstrating how client and constituency engagement, assessment, intervention, and evaluation are guided by knowledge of human behaviour and the social environment (HBSE) theory. The Handbook applies HBSE theories differently depending on client system size, context, and needs. Major concepts include power, oppression, and identity formation. This essential, up-to-date volume formulates strategies to eliminate personal bias and to promote human rights. In addition, it integrates ethics, research, policy content, diversity, human rights, and social, economic, and environmental justice issues. It will serve as an insightful and influential guide to students, professors, and social workers.

Macro Skills Workbook

A Generalist Approach *Brooks/Cole Publishing Company*

This workbook provides a wide range of exercises, role playing activities and case scenarios to help students practice specific macro skills. The text's versatility allows it to be the primary text in a practice course or as a supplement to accompany other macro theory texts, especially *GENERALIST PRACTICE WITH ORGANIZATIONS AND COMMUNITIES, 2nd* by the same authors! The authors integrate macro development for field internships, as well as enhance macro skill development for social workers in the field. Specific macro practice skills are presented in a

straightforward manner, and both applications to actual macro practice situations and the importance of client system strengths are emphasized throughout.

Human Behavior in the Macro Social Environment

Brooks/Cole Empowerment Series: Human Behavior in the Social Environment *Cengage Learning*

This lively, comprehensive introduction to human behavior in the social environment offers a multidimensional approach to the topic, with discussion of integrative practice, theory, treatment, and services as well as matters pertaining to diversity addressed throughout the text. The text provides solid coverage of foundation knowledge, integrates the biopsychosocial dimensions for assessing social functioning, and offers case studies to illuminate the applied aspects of the content. Furthermore, as part of the Brooks/Cole Empowerment Series, the fifth edition thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping students connect foundation knowledge with specific practice concerns. Study tables and concept maps (for each discussion of behavior in the development chapters) clarify major phases of biopsychosocial development across the life span. This framework gives students a concrete tool for assessing human behavior from a perspective that reflects the values and knowledge base of the social work profession. Development on Purpose

Faith and Human Behavior in the Social Environment

Development on Purpose: Faith and Human Behavior in the Social

Environment provides both students and seasoned professionals with a coherent framework for considering HBSE from a Christian perspective. Courses in human behavior and the social environment (HBSE) raise important questions about the nature of persons and our multi-layered social world. The Christian faith offers answers to these deep questions about human nature and our relationships with one another and the world. Also, Christianity provides a compelling purpose for human development. As social workers, this grand purpose can rightly inform the trajectory of our own lives and sustain our work on behalf of those at risk in the world. The first half of Development on Purpose outlines a purpose for human development, examining biological, psychological, and social theories through the lens of faith. This includes chapters on: Biblical Themes to Ground Us A Theological Model for Understanding Human Behavior in the Social Environment (HBSE) The Perspectives of Social Work from the Lens of Faith The Biological Dimension The Psychological Dimension The Social Dimension The second half of Development on Purpose then uses detailed case examples to illuminate the way that faith can relate to work with persons across the lifespan. This includes chapters on: Infancy: Early Growth toward God and Others Childhood: Playing and Learning (ages 3-12) Adolescence: Leaning into Identity (ages 13-18) Emerging Adulthood: Feeling In-Between Middle Adulthood: At the Intersection of Growth and Decline Older Adulthood: Finishing Well In showing how a Christian understanding of humans can inform the study and practice of social work, the book's chapters can be used interchangeably, making this an excellent companion text for Human Behavior in the Social

Environment and related courses in faith-based social work programs. Development On Purpose contains 12 chapters and more than 225 pages.

Human Behavior in the Social Environment

Perspectives on Development, the Life Course, and Macro Contexts *Routledge*

In this book and companion custom website you will find:

- A comprehensive overview of the issues related to human behavior and the social environment that are important to understand for practice, updated with current and relevant information on important topics in social work. Additional relevant content, contemporary theories, and intervention modalities are incorporated throughout the text to keep students up to date with what is happening in the field.
- Careful organization of chapters to first present foundational theoretical perspectives on the human condition, and then provide information on basic facets of human development, encouraging students to use conceptual lenses to inform their practice with individuals at different stages of life. Four final chapters cover theoretical foundations and issues surrounding spirituality, families and groups, organizations, and communities. These chapters offer in-depth information and discussions on mezzo and macro content. The organization of the chapters also helps students better understand how contemporary theories and approaches to issues stem from foundational theories and how they can be used to inform work with clients.
- Particular emphasis on the ways in which poverty, diversity, and strengths affect human

development and behavior.

- The opportunity to see how the concepts fit into social work practice using case examples that open each chapter and are referred to throughout the chapter.
- Interactive case studies at www.routledgesw.com/cases: Six easy-to-access fictional cases with dynamic characters and situations that students can easily reach from any computer and that provide a “learning by doing” format unavailable with any other text. Your students will have an advantage unlike any other they will experience in their social work training.
- A wealth of instructor-only resources at www.routledgesw.com/hbse that provide full-text readings that link to the concepts presented in each of the chapters; a complete bank of objective and essay-type test items, all linked to current CSWE EPAS (Council on Social Work Education Educational Policy and Accreditation Standards); PowerPoint presentations to help students master key concepts; annotated links to a treasure trove of social work assets on the Internet; and a forum inviting all instructors using books in the series to communicate with each other and share ideas to improve teaching and learning.
- Ideal for use in online as well as hybrid course instruction—in addition to traditional “bricks and mortar” classes. This bestseller is ideal for use in either one-semester or year-long generalist human behavior courses. Why? Because the text is concise and easily used in a one-semester course. But the text also comes with a companion set of readings, additional chapters focused on macro social work, and six unique cases that encourage your students to “learn by doing” and to apply their knowledge of human behavior to best practices. Go to www.routledgesw.com/hbse to learn more. These additional resources easily allow you to use the text

(and its related resources) in a two-semester sequence.

Human Behavior and the Social Environment

Shifting Paradigms in Essential Knowledge for Social Work Practice

"This text begins with a presentation of the basic purposes and foundations of social work and social work education and their relationship to Human Behavior and the Social Environment (HBSE). Next, a conceptual framework for thinking about both traditional and alternative ways in which knowledge about human behavior and the social environment is created and valued is outlined. The book then uses the notions of traditional and alternative paradigms to organize and present a variety of theories, perspectives, and practice models relevant to HBSE"--

Macro cognition in Teams

Theories and Methodologies *CRC Press*

Team collaboration involves many operational tasks such as team decision-making or course of action selection, developing shared understanding, and intelligence analysis. These operational tasks must be performed in many situations, often under severe time pressure, with information and knowledge uncertainty, large amounts of dynamic information and across different team characteristics. Recent research in this area has focused on various aspects of human collaborative decision-making and the underlying cognitive processes while describing those processes at different levels of detail, making it difficult to compare research results. The theoretical construct of 'macro cognition in teams' was developed to facilitate cognitive research in team collaboration, which will enable a common level of understanding when defining, measuring and discussing the cognitive processes in team collaboration. Macro cognition is defined as both the internalized and externalized mental processes employed by team members in complex, one-of-a-kind, collaborative problem solving. Macro cognition in Teams provides readers with a greater understanding of the macrocognitive processes which support collaborative team activity, showcasing current research, theories, methodologies and tools. It will be of direct relevance to

academics, researchers and practitioners interested in group/team interaction, performance, development and training.
