Spina Bifida Genetic And Developmental
 Experts know that genes play a role, and they are looking for the exact gene (s) that cause Spina Bifida. In time, research should clearly show how Spina Bifida develops so new treatments or even a cure can be developed. This research may also lead to new tests that help people or couples understand their chance of having a baby with Spina Bifida.

Genetics & Spina Bifida - Spina Bifida Association

Spina bifida is the most common type of open neural tube defect. Neural tube defects can be caused by genes passed on from both parents (inherited). They also can be caused by environmental factors like obesity or uncontrolled diabetes in the mother, and by some prescription medicines.
