Others are required in smaller quantities and are sometimes called trace minerals, e.g. iron, zinc, iodine, fluoride, selenium and copper. Despite being required in smaller amounts, trace minerals are no less important than other minerals. Minerals are often absorbed more efficiently by the body if supplied in foods rather than as supplements.

Minerals and trace elements - British Nutrition Foundation

" It is Dr. Schroeder's thesis that life originated in the sea, and when animals - including man - became terrestrial, they brought with them a necessity for those trace elements which occur naturally in sea water. These elements, generally present in minute amounts, are essential for normal metabolism.
