This gives rise to the problem of cross-language information retrieval (CLIR), whose goal is to find relevant information written in a different language to a query. In addition to the problems of monolingual

information retrieval (IR), translation is the key problem in CLIR: one should translate either the query or the documents from a language to another.

Cross-Language Information Retrieval, Morgan & Claypool ...

Cross-language information retrieval (CLIR) tries to identify relevant documents in a language different from that of the query. This problem is more and more acute for IR on the Web due to the fact that the Web is a truly multilingual environment. In addition to the problems of monolingual IR, CLIR is faced with the problem of language
