Controlling vehicle attitude requires sensors to measure vehicle orientation, Satellite Attitude Control System Nuts What is ACDS? This subsystem is responsible for controlling (Attitude Control System, ACS) and determining (Attitude Determination System, ADS) the orientation of our satellite. Given that we need our LEDs to face Earth in order to be seen, we need to be able to control the direction that they are facing while on orbit.

... The nonlinear H_∞ control design of a polynomial system for large satellite attitude maneuvers is taken as our example. Simulation results show that the SOS method is comparable to the LMI method used for linear systems, and it is expected to find a broad range of applications in the analysis and design of nonlinear systems. 1.

Abstract-Control moment gyroscope is a spacecraft attitude control actuators which act as torque amplifier. It is suitable for three axis slew maneuvering by providing the necessary torques via gambling a spinning flywheel. Control moment gyroscope is considered to be more efficient than current actuators such as reaction/momentum wheels in term of power consumption and slew rate.

Simulation of Three Axis Attitude Control Using a Control

... Asides the implementation of passive attitude control such as the gravity-gradient stabilization, most spacecraft make use of active control which exhibits a typical attitude control loop. The design of the control algorithm depends on the actuator to be used for the specific attitude maneuver although using a simple proportional-integral-derivative controller (PID controller) satisfies most control needs.
