The enhancement of SHG can be done by the use of optical resonance. First, let's consider the external cavity SHG, which is shown in Fig. 7, where the output power of the oscillator into the resonator is I_0 , the reflectivities of the input side and the other side mirrors are R_1 and R_2 , the circulation power in the resonator is I_c . As it is well known, [16] the highest enhancement of the ...

Overview. Resonance occurs when a system is able to store and easily transfer energy between two or more different storage modes (such as kinetic energy and potential energy in the case of a simple pendulum). However, there are some losses from cycle to cycle, called damping. When damping is small, the resonant frequency is approximately equal to the natural frequency of the system, which is a ...
