Organizational Learning: A Theory of Action Perspective ...

Organizational Learning Theory: The Three Types of Learning. Argyris and Schon (1996) identify three levels of learning which may be present in the organization: Single loop learning: Consists of one feedback loop when strategy is modified in response to an unexpected result (error correction). E.g. when sales are down, marketing managers inquire into the cause, and tweak the strategy to try to bring sales back on track.

Organizational Learning Theory - Knowledge Management

What is organizational learning theory? The theory of organizational learning focuses on the creation of knowledge and the use of that knowledge within an organization. Key aspects of organizational learning theory are that learning happens when people interact while finding and solving problems. Organizational learning theory stresses the importance of developing a learning culture within an organization. According to this theory, organizations should:

Organizational Learning A Theory Of Action Perspective ...

Organizational learning is a relatively recent metaphor for the organization which matches two concepts—learning and organization—and enables exploration of the organization as if it were endowed with a stock of knowledge, skills and expertise. At a theoretical level it represents the organization which acts according to principles of experimentation, of trial and error, of success and failure, of discovery and invention.

Organizational Learning - an overview | ScienceDirect Topics

Organizational learning is related to the studies of organizational theory, organizational communication, organizational behavior, organizational psychology, and organizational development. Organizational learning has received contributions from the fields of educational psychology , sociology , economics , anthropology , political science , and management science .

Organizational learning - Wikipedia

Organizational theory is the sociological study of formal social organizations, such as businesses and bureaucracies, and their

interrelationship with the environment in which they operate. It complements the studies of organizational behavior and human resource studies.

Organizational Theories: 12 Major Organizational Theories

In this organizational schema single-loop learning is characterized as when, 'members of the organization respond to changes in the internal and external environment of the organization by detecting errors which they then correct so as to maintain the central features of theory-in-use' (ibid.: 18). Double-loop learning then becomes:

Chris Argyris: theories of action, double-loop learning ...

The literature on organizational learning has concentrated on the detached collection and analysis of the processes involved in individual and collective learning inside organizations; whereas the learning organizations literature has an action orientation, and is geared toward using specific diagnostic and evaluative methodological tools which can help to identify, promote and evaluate the quality of learning processes inside organizations. Organizational learning : a theory of action perspective ...

Organizational learning is an area of knowledge within organizational theory that studies models and theories about the way an organization learns and adapts.

Organizational learning | Psychology Wiki | Fandom

Concise description of theory Organizational learning theory states that, in order to be competitive in a changing environment, organizations must change their goals and actions to reach those goals.

Organizational learning theory - IS Theory

No theory or model of organizational learning has widespread acceptance. This paper clarifies the distinction between organizational learning and organizational adaptation and shows that change does not necessarily imply learning. There are different levels of learning, each having a different impact on the strategic management of the firm.

Organizational Learning - JSTOR

We define organizational learning as the capacity or processes within an organization to maintain or improve performance based on experience. Learning is a systems-level phenomenon because it stays within the organization, even if individuals change. One of our assumptions is that organizations learn as they produce.
