Despite this difference
in the source of failure
between software and
hardware, several

software reliability
models based on
statistics have been
proposed to quantify
what we experience
with software: the
longer software is run,
the higher the
probability that it will
eventually be used in
an untested manner
and exhibit a latent
defect that results in a
failure (Shooman
1987), (Musa 2005),
(Denney 2005).
