Basic Drawing Conventions Engineering

Ink Drawing – The line group is designated according to the thickness of the thickest line. For any particular drawing, a line-group is selected according to its size and type. All lines should be sharp and dense so that good

prints can be reproduced. Pencil Drawing – For drawing finalized with pencil, the lines can be divided into two line-groups. It is important to note that in the finished drawing, all lines except construction line should be dense, clean and uniform.

Construction drawings

communicate how something is built by showing specific assemblies and by employing architectural drawing conventions. These conventions are fairly standard throughout the industry and are used to reduce the drawing time and space needed to convey information. For example, in Figure 5-16, a graphic symbol with an arrow drawn on a cabinetry section denotes the exact place the section was cut and the direction of the view taken in the resulting section drawing.
