A dynamometer is a device that can measure force, power, or speed—so you can figure out how much power you need or how much you have to hand. But dynamometers come in all shapes and sizes. A spring dynamometer is just about the simplest kind you can imagine: it's a sturdy metal spring on a two-part mounting. You anchor one end, attach the other end to the force you're trying to measure, and read the size of the force off a scale.
