Panel filters play an important role in extending lifetime and IAQ of air handling units in residential and commercial buildings, hospitals or even make-up units for cleanroom processes. Prefilters are meant to protect fine filters in all applications by capturing larger particles such as coarse and ePM10 both in intake air or recirculation air. Our panel filters are available in a wide range of sizes.

Panel Filters - Pre Filtration for your HVAC systems | Camfil

The panels are typically made from a softwood timber frame and sheathed in the factory with structural sheet material, such as plywood or oriented strand board (OSB). A reflective water tight, yet breathable, membrane is factory fitted on the outside panel face and left open on the inside (hence the name).
