Valve Stem Seals Skf

Valve stem seals provide a defined metering rate of oil to the valve stem interface of internal combustion engines to lubricate the valve guide and minimize engine emissions. They are available for diesel and gasoline engines with and without boosting. In addition to

conventional valve stem seals, our offer also includes valve stem seals for engines with high pressures in the manifolds, e.g. because of turbochargers or for exhaust brakes on commercial engines.

Valve stem seals | SKF

Valve stem seals are devices that provide a defined metering rate of oil to the valve stem interface of internal combustion engines to lubricate the valve guide and minimize engine missions. SKF valve stem seals are available for diesel and gasoline engines with and without boosting.

Valve stem seals - redirects.skf.com

Valve stem seals are devices that are engineered to allow a

small amount of oil to pass through their lips (oil-metering) to lubricate the valve stem / valve guide interface of an engine. If too much oil passes through the lip of the seal, emissions are worsened and coke builds up on the valve, potentially causing the engine to lose power or even fail.

SKF Valve stem seals

SKF offers new designs of high-pressure valve stem seals, providing minimized guide wear and cost savings in the engine blow-by management: Lower risk of valve stem scuffing and guide wear as oil lubrication remains stable under pressure; Reduced blow-by gas volume as the seals do not allow air flow to the top of

the cylinder head
