Which sequence below is correct with

regard to the passage of light through the eye to form an image on the retina?

A cornea → conjunctiva → lens → vitreous humour → retina

### **THE HUMAN EYE & EAR Checklist**

This light enters the eye through the cornea, which acts like a window at the front of the eye. The amount of light entering the eye is controlled by the pupil, which is surrounded by the iris – the coloured part of the eye. Because the front part of the eye is curved, it bends the light, creating an upside down image on the retina. The brain eventually turns the image the right way up.
