The Politics of Green Transformations Routledge

Multiple 'green transformations' are required if humanity is to live sustainably on planet Earth. Recalling past transformations, this book examines what makes the current challenge different, and especially urgent. It examines how green transformations must take place in the context of the particular moments of capitalist development, and in relation to particular alliances. The role of the state is emphasised, both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations. The book also highlights the role of citizens, as innovators, entrepreneurs, green consumers and members of social movements. Green transformations must be both 'top-down', involving elite alliances between states and business, but also 'bottom up', pushed by grassroots innovators and entrepreneurs, and part of wider mobilisations among civil society. The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability. Written by experts in the field, this book will be of great interest to researchers and students in environmental studies, international relations, political science, development studies, geography and anthropology, as well as policymakers and practitioners concerned with sustainability.

American Foreign Policy Since World War II CQ Press

The Gold Standard for Textbooks on American Foreign Policy *American Foreign Policy Since World War II* provides you with an understanding of America's current challenges by exploring its historical experience as the world's predominant power since World War II. Through this process of historical reflection and insight, you become better equipped to place the current problems of the nation's foreign policy agenda into modern policy context. With each new edition, authors Steven W. Hook and John Spanier find that new developments in foreign policy conform to their overarching theme—there is an American "style" of foreign policy imbued with a distinct sense of national exceptionalism. This Twenty-First Edition continues to explore America's unique national style with

chapters that address the aftershocks of the Arab Spring and the revival of power politics. Additionally, an entirely new chapter devoted to the current administration discusses the implications of a changing American policy under the Trump presidency.

Racial Realignment

The Transformation of American Liberalism, 1932-1965 Princeton University Press

Few transformations in American politics have been as important as the integration of African Americans into the Democratic Party and the Republican embrace of racial policy conservatism. The story of this partisan realignment on race is often told as one in which political elites—such as Lyndon Johnson and Barry Goldwater—set in motion a dramatic and sudden reshuffling of party positioning on racial issues during the 1960s. *Racial Realignment* instead argues that top party leaders were actually among the last to move, and that their choices were dictated by changes that had already occurred beneath them. Drawing upon rich data sources and original historical research, Eric Schickler shows that the two parties' transformation on civil rights took place gradually over decades. Schickler reveals that Democratic partisanship, economic liberalism, and support for civil rights had crystallized in public opinion, state parties, and Congress by the mid-1940s. This trend was propelled forward by the incorporation of African Americans and the pro-civil-rights Congress of Industrial Organizations into the Democratic coalition. Meanwhile, Republican partisanship became aligned with economic and racial conservatism. Scrambling to maintain existing power bases, national party elites refused to acknowledge these changes for as long as they could, but the civil rights movement finally forced them to choose where their respective parties would stand. Presenting original ideas about political change, *Racial Realignment* sheds new light on twentieth and twenty-first century racial politics.

The International Relations of the Bible Post Hill Press

International relations is an increasingly important topic for the average American. It determines job prospects, economic growth and decline, war, peace, and whether or not a foreign entity uses a weapon of mass destruction. The practice and theory of international relations by today's presidents and dictators is grounded in ideologies that have shaped societies throughout history—ideologies that dominate the world of the Bible. Whether it was the Babylonian and Egyptian Empires, the influence of Greek Hellenism, or the Romans' critical role, international relations are an omnipresent backdrop. There can be no story of Exodus, no Babylonian captivity, no explanation for the constant war in Syria, no publicans or Roman governors, no judgment by Pontius Pilate, and no St. Paul's story as a Roman citizen, without considering the role of international affairs.

No Ordinary Disruption

The Four Global Forces Breaking All the Trends *PublicAffairs*

Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, No Ordinary Disruption: The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard-pressed to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life— facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

Gendered Electoral Financing

Money, Power and Representation in Comparative Perspective *Routledge*

Illustrated by in-depth empirical research from six country studies, Gendered Electoral Financing: Money, Power and Representation in Comparative Perspective is the first cross-regional examination of the nexus between money, gender and political recruitment across the world. Money is assumingly one of the greatest barriers to women in the political recruitment process. The financial

disadvantage of women is expected to constitute an obstacle for women's entry into politics everywhere and especially in developing countries where women's socio-economic status is disproportionately low relative to men's. This line of reasoning has caused a global upswing in both candidate- and party-directed financial schemes introduced to enhance gender balance in political office. This book develops a typology of different kinds of gendered electoral financing schemes and builds theories about its causes and consequences. By comparing how gendered electoral financing affects political recruitment processes in both established and emerging democracies, the authors identify whether and how the funding mechanisms incentivize a shift in political behavior. Gendered Electoral Financing is a timely, informative and well-written book that does an excellent job of explaining, in language accessible to students and researchers alike, the cost of elections, gender imbalance in political office and the effects of financial incentive mechanisms to increase women's representation in politics.

The Daily Show (The Book)

An Oral History as Told by Jon Stewart, the Correspondents, Staff and Guests *Grand Central Publishing*

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate

debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

Trend and Transformation, Fourth Edition

Chinese Politics in the Xi Jinping Era

Reassessing Collective Leadership *Brookings Institution Press*
Chinese politics are at a crossroads as President Xi Jinping amasses personal power and tests the constraints of collective leadership. In the years since he became general secretary of the Chinese Communist Party in 2012, Xi Jinping has surprised many people in China and around the world with his bold anti-corruption campaign and his aggressive consolidation of power. Given these new developments, we must rethink how we analyze Chinese politics—an urgent task as China now has more influence on the global economy and regional security than at any other time in modern history. *Chinese Politics in the Xi Jinping Era* examines how the structure and dynamics of party leadership have evolved since the late 1990s and argues that "inner-party democracy"—the concept of collective leadership that emphasizes deal making based on accepted rules and norms—may pave the way for greater transformation within China's political system. Xi's legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world's most populous and increasingly pluralistic country. Cheng Li also addresses the recruitment and composition of the political elite, a central concern in Chinese politics. China analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th Central Committee, including tables and charts detailing their family

background, education, occupation, career patterns, and mentor-patron ties.

Issues in World Politics *Macmillan International Higher Education*

An edited introductory text in International Relations focusing centrally on key issues rather than theories, structures or processes. The aim is to build a bridge into the subject from students' interests in Current Affairs and thus to have particular appeal to the large numbers of students who do not go on to further study in International Relations. It will also be a useful complement to standard textbooks for those who do.

Do You See What I See?

Memoirs of a Blind Biker *Hampton Roads Publishing*

Now in paperback, the droll memoir by a world-class physicist that includes recollections of his involvement with pioneering laser research, encounters with many of the most recognizable literary, cultural, and entertainment figures of the 20th century, and his role in teaching ESP techniques to the CIA--a real-life X-Files saga. Russll Targ is a Zelig-like character. His story is an idiosyncratic journey through the highways and byways of American intellectual, scientific, and cultural life in 20th century. His father (the long-time editor-in-chief at Putnam) acquired *The Godfather* on the basis of an outline scribbled on the back of a napkin. His mother was the first press agent of the fan dancer Sally Rand. His step-mother is the legendary literary agent Rosalind Targ. He was married for thirty years to the sister of the infamous chess master Bobby Fischer. He briefly dated Henny Youngman's cousin. He attended college with Alan Alda's wife, Arlene. He was part of Ayn Rand's study group in the 1950s--along with economist Alan Greenspan. He was a pioneer in laser research. He spent many years developing air-borne laser wind sensors for Lockheed and NASA. He co-founded the Stanford Research Institute remote viewing program--which was funded by the CIA--and was instrumental in tracking Soviet and Chinese weapon installations during the Cold War. And, he is a legally blind motorcyclist—who happens to be a Buddhist. This is a fascinating memoir by a first-class intellect; the story of a physicist who has pushed the boundaries of science to explore the realms of parapsychology, spirituality, and the unexplained.
