Civil and  
 Environmental Systems  
 Engineering is  
 designed for a junior-

The Civil and Environmental Systems Engineering MS degree program develops an in-depth understanding of the core methods and their applications with a focus on one or several domains. It is recommended that students take courses on methods (such as

economics, data mining and optimization) and technologies (such as smart cities), as well as domain specific courses (such as intelligent transportation systems, smart buildings, water resource systems, environmental systems, smart sensing

The civil engineering profession is concerned with the built environment. Civil engineers plan, design, and construct major facilities, including highways, transit systems, airports, dams, water and wastewater treatment systems, tunnels, energy facilities, harbors, canals, buildings, and bridges. Civil engineers manage our air, water, and energy resources and protect society from natural catastrophes, such as earthquakes, and the hazards society itself generates in the form of toxic wastes.
