The Laban Movement Analysis system (LMA) is a widely used system for the description of human movement. Here we present results of an empirical analysis of the reliability of the LMA system. Firstly, we developed a directed graph-based representation for the formalization of LMA.

Laban movement analysis - Wikipedia

The Laban Mento uses a standard #6-sized steel nib with a bi-color plating. This Mento

came with a Fine nib. The nib was smooth, but not too much so, still providing a bit of pleasant feedback. The nib's line was a little narrower than a standard western fine, but if I had to guess, I'd say that is because the nib ran slightly on the dry side.
