Event Driven Architecture How Soa

Event-driven SOA is a form of service-oriented architecture, combining the intelligence and proactiveness of event-driven architecture with the organizational capabilities found in service offerings. Before event-driven SOA, the typical SOA platform orchestrated services centrally, through pre-defined business processes, assuming that what should have already been triggered is defined in a business process. This older approach does not account for events that occur across, or outside of, specifi

Event-driven SOA - Wikipedia
