How Do You Program The

An important beginning step is to have a plan for what program you want to develop. For instance, a plan would include the purpose of the program, game, or service, and the features you want to include. Be thinking of what your plan is as you continue reading. Picking the language. As we noted above, there are many different programming languages.

How do I create a computer program?

Choose a programming language. Computer programming is done as essentially a set of written instructions that the computer follows (also known as binary coding). These instructions can be written in several different "languages", or which are simply different ways of organizing the instructions and text.

How to Start Learning Computer Programming (with Pictures)

Start with a "1-2-3" program. This is the most simple type of program, and allows you to get comfortable with your programming language. Basically, a 1-2-3 program starts, asks for input from the user, and then displays a result.

After the result is displayed, the program ends.
