The Camarilla pivot point is a math-based leading indicator that provides accurate and automated levels of support and resistance levels. The Camarilla points contain one central pivot point along with 4 levels of support and 4 levels of resistance. This leading technical indicator was developed by Nick Scott, a bond trader, in 1989.

Camarilla Pivot Trading Strategy - Trading Strategy Guides

Camarilla equations are used to calculate intraday support and resistance levels using the previous days volatility spread. Camarilla equations take previous day's high, low and close as input and generates 8 levels of intraday support and resistance based on pivot points. There are 4 levels above pivot point and 4 levels below pivot points.
