Hybrid Petct And Spectct Imaging

Much of the integration in hybrid PET/CT or SPECT/CT systems occurs at the software and system control level. Hybrid systems that combine PET and MRI also are under development. MRI has advantages over CT for some structural imaging applications because of the high contrast it can produce in soft tissues; however, integration is much more challenging, and the cost of a combined device could be ...

The risk to poor superimposition of separate imaging is mitigated and, importantly, the hybrid PET/CT process lessens encumbrance on the patient by simplifying the scanning scheduling process. One main advantage of a PET/CT scanner is that it uses the CT images (as transmission images) for attenuation correction of the PET data, rather than relying on a rotating transmission rod source.
