### **Decoding The Disciplines Helping Students**

Decoding the Disciplines - Improving student learning. Decoding the Disciplines is a process for increasing student learning by narrowing the gap between expert and novice thinking. Beginning with the identification of bottlenecks to learning in particular disciplines, it seeks to make explicit the tacit knowledge of experts and to help students master the mental actions they need for success in particular courses.

### **Decoding the Disciplines - Improving student learning**

Using the Decoding the Disciplines model, faculty who are deeply ingrained in their disciplinary research answer a series of questions to understand how students think and learn in their field. The cross-disciplinary nature of the process clarifies the thinking for each discipline.

The "Decoding the Disciplines" model takes advantage of the differences in thinking among academic fields in order to decode each individual discipline. Following the model, faculty answered a series of questions to define crucial bottlenecks to learning, dissected the

ways an expert deals with the issues that causes the bottleneck, and invented ways to model this thinking for students.

### **Decoding the Disciplines: Helping Students Learn ...**

Decoding the Disciplines begins with a simple task: identifying bottlenecks—that is, points in a course where the learning of a significant number of students is interrupted (Anderson, 1996). Virtually anyone who has

Decoding the Disciplines. Most instructors notice places in their courses where students find it difficult to learn. Decoding the Disciplines holds that these stuck places, or “bottlenecks” to learning, mark the important ways of knowing in a field. By “Decoding” what an expert does so that they do not get stuck at the bottleneck, we can spell out the expert’s mental process, the “critical thinking” of a discipline.

About - Decoding the Disciplines. As Decoding the Disciplines emerged in the late 1990s and early 2000s from the work of the Indiana University Freshman Learning Project, this work began to coalesce around seven basic activities that could increase student learning. These were arranged in a series of steps that instructors can follow to organize their responses to obstacles to student learning.
