A digital image, in its most basic form, is a collection of numbers arranged in two or three dimensions (called matrix). Each of these numbers is encoded into some shade of a color palette. These numbers are called the pixels of the image. So a 1 Megapixel image contains 1 million pixels. Each of them assumes a number varying within a certain range. To illustrate this, let's analyze the following images carefully. Fig. 1.1. The left image is a typical black & white pixel image showing
