A quantum theory of the interaction between electromagnetic radiation and matter such as electrons is

described by the theory of quantum electrodynamics. Electromagnetic waves can be polarized, reflected, refracted, diffracted or interfere with each other.

Electromagnetic radiation - Wikipedia

The propagation between the earth and the ionosphere—and then in the lower part of the ionosphere up to 100 km altitude—of VLF radio waves sent by a ground transmitter is studied. The aim of this study is to calculate the field pattern at an altitude of 100 km in a circular area of radius 1000 km around the transmitter.
