Evolution Education Around the Globe Springer

This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe

such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include

common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

South Korea at the Crossroads

Autonomy and Alliance in an Era of Rival Powers *Columbia University Press*

Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In *South Korea at the Crossroads*, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the

subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the “Nordpolitik” engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung’s “Sunshine Policy,” designed to bring North Korea into the international community; “trustpolitik,” which sought to foster diplomacy with North Korea and Japan; and changes in South Korea’s relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security. Although China is a tempting option, Snyder argues that only the United States is both credible and capable in

this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.
