Ceramic On-Demand Extrusion (CODE) is a recently developed freeform extrusion fabrication process for producing dense ceramic components from single and multiple constituents. In this process, aqueous paste of ceramic particles with a very low binder content (<1 vol%) is extruded through a moving nozzle to print each layer sequentially.

Freeform extrusion fabrication of advanced ceramics and ...

To begin the extrusion process, high-quality raw materials are blended to create a homogenous mixture. These are high-temperature, low-expansion materials, allowing them to withstand fluctuations in extreme temperatures inside your engine. Next, liquid is added to the raw material mixture and poured into a conical hopper.
