The Art of the Dog *AuthorHouse*

The reason I felt compelled to write this book is because I guess I am a bit of a rebel in that I disagree with much of the practices I see from many other dog trainers. Having established that, I don't claim to be the "know all and end all" of dog training. What I do believe is that if you follow the information that I am sharing, you should have the joy of a great relationship with your canine best friend.

For him, his family's dog is just a great pal. And protector. Jack cannot know that Redburn, a "leash-licking" Irish setter, is McKinley's rival for the job of head dog. The boy cannot know, with the sudden hillside appearance of a she-wolf, Lupin, that not only McKinley's job -- but his life -- is in danger. Lupin's message: Dogs free yourselves from mankind. Come join us, we who need you to replenish our diminishing wolf pack in the wild. But imagine how a good dog, loyal to his human pup, would hear Lupin's call! McKinley's thrilling story tells itself, as first he and the boy together encounter Lupin in a canyon perfect for an old-time ambush, and later as they try to save her from both Redburn and a neighbor, a vicious man armed with a gun and a grudge. No one -- not even McKinley -- can foresee the end.

Considerations for the City Dog *Muttstuff Publishing*

Melissa McCue-McGrath CPDT-KA, wrote this book in response to a dog nearly killing a 6'4" man and his German shepherd in her city. After that terrible incident, and a decade of working with frustrated dogs in urban centers, she spoke with professionals in related dog industries. She consulted with veterinarians, rescue volunteers, behavior specialists, certified dog trainers, dog daycare providers, groomers and more to identify why urban dogs are failing, and what we need to do to help these dogs succeed. The same issues -- and solutions -- came up again and again across the board. This book explains how to find the right dog for a city environment; identifies how to find a good care taker for your pet; defines "behaviorist"; explains how to get exercise for an athletic dog in a city of leash-laws; and pontificates on how to responsibly advocate for an urban dog. Most importantly, this book lays out how exactly to find reputable help for any possible issue, and holds your hand if things are not working as hoped. This is not a dog training book - there are thousands on the market already. Instead, this book will supplement any science-based training regimen. It gives insight as to why dogs do what they do, but perhaps more importantly, it explains why people do what they do and why we must do better for the sake of our urban dogs. We all need to do better - our urban dogs are in the balance.

The Lizard King

The True Crimes and Passions of the World's Greatest Reptile Smugglers *Twelve*

Imagine The Sopranos, with snakes! The Lizard King is a fascinating account of a father and son family business suspected of smuggling reptiles, and the federal agent who tried to take them down. When Bryan Christy began to investigate the world of reptile smuggling, he had no idea what he would be in for. In the course of his research, he was bitten between the eyes by a blood python, chased by a mother alligator, and sprayed by a bird-eating tarantula. But perhaps more dangerous was coming face to face with Michael J. Van Nostrand, owner of Strictly Reptiles, a thriving family business in Hollywood, Florida. Van Nostrand imports as many as 300,000 iguanas each year (over half the total of America's most popular imported reptile), as well as hundreds of thousands of snakes, lizards, frogs, spiders, and scorpions. Van Nostrand was suspected of being a reptile smuggler by Special Agent Chip Bepler of the U.S. Fish and Wildlife Service, who devoted years of his life in an obsessive quest to expose The Lizard King's cold-blooded crimes. How this cat-and-mouse game ended is engrossing and surprising.

Dog, Inc.

How a Collection of Visionaries, Rebels, Eccentrics, and Their Pets Launched the Commercial Dog Cloning Industry *Penguin*

What Stiff did for the dead and Fast Food Nation did for the burger, Dog, Inc. does for the stranger-than-fiction world of commercial dog cloning. It all began with a pit bull named Booger. Former Miss Wyoming Bernann McKinney was so distraught over the death of her dog, whom she regarded as her guardian and savior, that she paid \$50,000 to RNL Bio for the chance to bring her beloved companion back to life. The result were five new Boogers—the first successful commercial cloning of a canine—delivered in 2008, along with a slew of compelling questions about the boundaries of science, commerce, and ethics. Blending shocking investigative reporting with colorful anecdotes, Pulitzer Prize-winning John Woestendiek takes readers behind the scenes of this emerging industry. But Dog, Inc. isn't just a book about pets. Nor is it just a book about science. Rather it's a fascinating look at how our emotional needs are bending the reaches of science and technology, as well as a study of this uncharted territory. With our pet obsession climbing to new heights and our scientific abilities even more so, this combination raises a serious concern: Are we crossing the boundary of controlling science in the name of science, in the name of love, in the name of merchandising—or a blend of all three?

Survival of the Friendliest

Understanding Our Origins and Rediscovering Our Common Humanity *Random House*

A powerful new theory of human nature suggests that our secret to success as a species is our unique friendliness "Brilliant, eye-opening, and absolutely inspiring—and a riveting read. Hare and Woods have written the perfect book for our time."—Cass R.

Sunstein, author of *How Change Happens* and co-author of *Nudge* For most of the approximately 300,000 years that *Homo sapiens* have existed, we have shared the planet with at least four other types of humans. All of these were smart, strong, and inventive. But around 50,000 years ago, *Homo sapiens* made a cognitive leap that gave us an edge over other species. What happened? Since Charles Darwin wrote about “evolutionary fitness,” the idea of fitness has been confused with physical strength, tactical brilliance, and aggression. In fact, what made us evolutionarily fit was a remarkable kind of friendliness, a virtuosic ability to coordinate and communicate with others that allowed us to achieve all the cultural and technical marvels in human history. Advancing what they call the “self-domestication theory,” Brian Hare, professor in the department of evolutionary anthropology and the Center for Cognitive Neuroscience at Duke University and his wife, Vanessa Woods, a research scientist and award-winning journalist, shed light on the mysterious leap in human cognition that allowed *Homo sapiens* to thrive. But this gift for friendliness came at a cost. Just as a mother bear is most dangerous around her cubs, we are at our most dangerous when someone we love is threatened by an “outsider.” The threatening outsider is demoted to sub-human, fair game for our worst instincts. Hare’s groundbreaking research, developed in close coordination with Richard Wrangham and Michael Tomasello, giants in the field of cognitive evolution, reveals that the same traits that make us the most tolerant species on the planet also make us the cruelest. *Survival of the Friendliest* offers us a new way to look at our cultural as well as cognitive evolution and sends a clear message: In order to survive and even to flourish, we need to expand our definition of who belongs.

How Stella Learned to Talk

The Groundbreaking Story of the World’s First Talking Dog *HarperCollins*

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn’t take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn’t they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word “outside” when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella “spoke” her first word, and the other breakthroughs they’ve had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.
