Metric Awg Wire Size Equivalents

In America, the commonest system is the AWG numbering scheme, where the numbers are applied not only to individual strands but also to equivalent size bunches of smaller strands. For example, 24 AWG could be made of 1 strand of 24 AWG wire (1/24) or 7 strands of 32 AWG wire (7/32). As standard metric wire sizes commonly used in manufacture do not generally correspond exactly to American wire sizes, some stranding configurations do not have equivalents in practice.
