A performance exhaust system is a characterizing element for any internal combustion conveyance. Defining the acoustic profile and influencing the powerband — exhaust design is a more dynamic science than stringing together a few pipes and tacking on some mufflers. The exhaust system of a car is one of the most commonly modified areas when a gearhead gets ahold of their ride.

Performance Exhaust System Design And Theory

The exhaust system that follows the exhaust manifold or headers should be allowed to move slightly as needed, to prevent stress-related damage and to help isolate the exhaust system from the chassis. This will help to minimize bothersome harmonic vibration that is otherwise felt and heard in the passenger compartment; rubber or other damping material is used on OEM exhaust hangers are used for this reason.
