Balancing Equations Sheet 61 Answer

When you find difficulty in balancing the equation in the balancing chemical equations worksheet, you can miss it with a fraction of $\frac{1}{2}$ and that will easily balance the equation. But the problem is that you cannot have a fraction for the co-efficient, this is why doubling all coefficients will help you balance the equation.

49 Balancing Chemical Equations Worksheets [with Answers]

Balanced Only With Coefficients - While balancing the chemical equations, balance them only by placing coefficients in front of them. By no means should you add subscripts because this will completely change the formula of the particular reactant or compound, causing a change in the entire meaning that the equation wants to render.
