Our Robots, Ourselves

Robotics and the Myths of Autonomy *Penguin*

“[An] essential book... it is required reading as we seriously engage one of the most important debates of our time.”—Sherry Turkle, author of Reclaiming Conversation: The Power of Talk in a Digital Age From drones to Mars rovers—an exploration of the most innovative use of robots today and a provocative argument for the crucial role of humans in our increasingly technological future. In Our Robots, Ourselves, David Mindell offers a fascinating behind-the-scenes look at the cutting edge of robotics today, debunking commonly held myths and exploring the rapidly changing relationships between humans and machines. Drawing on firsthand experience, extensive interviews, and the latest research from MIT and elsewhere, Mindell takes us to extreme environments—high atmosphere, deep ocean, and outer space—to reveal where the most advanced robotics already exist. In these environments, scientists use robots to discover new information

about ancient civilizations, to map some of the world’s largest geological features, and even to “commute” to Mars to conduct daily experiments. But these tools of air, sea, and space also forecast the dangers, ethical quandaries, and unintended consequences of a future in which robotics and automation suffuse our everyday lives. Mindell argues that the stark lines we’ve drawn between human and not human, manual and automated, aren’t helpful for understanding our relationship with robotics. Brilliantly researched and accessibly written, *Our Robots, Ourselves* clarifies misconceptions about the autonomous robot, offering instead a hopeful message about what he calls “rich human presence” at the center of the technological landscape we are now creating.

True Story

What Reality TV Says About Us *Farrar, Straus and Giroux*

Named a Best Nonfiction Book of 2022 by *Esquire* A sociological study of reality TV that explores its rise as a culture-dominating medium—and what the genre reveals about our attitudes toward race, gender, class, and sexuality What do we see when we watch reality television? In *True Story: What Reality TV Says About Us*, the sociologist and TV-lover Danielle J. Lindemann takes a long, hard look in the “funhouse mirror” of this genre. From the first episodes of *The Real World* to countless rose ceremonies to the White House, reality TV has not just remade our entertainment and cultural landscape (which it undeniably has). Reality TV, Lindemann argues, uniquely reflects our everyday experiences and social topography back to us. Applying scholarly research—including studies of inequality, culture, and deviance—to specific shows, Lindemann layers sharp insights with social theory, humor, pop cultural references, and anecdotes from her own life to show us who we really are. By taking reality TV seriously, *True Story* argues, we can better understand key institutions (like families, schools, and prisons) and broad social constructs (such as gender, race, class, and sexuality). From *The Bachelor* to *Real Housewives* to *COPS* and more (so much more!), reality programming unveils the major circuits of power that organize our lives—and the extent to which our own realities are, in fact, socially constructed. Whether we’re watching conniving *Survivor* contestants or three-year-old beauty queens, these “guilty pleasures” underscore how conservative our society remains, and how steadfastly we cling to our notions about who or what counts as legitimate or “real.” At once an entertaining chronicle of reality TV obsession and a pioneering work of sociology, *True Story* holds up a mirror to our society: the reflection may not always be pretty—but we can’t look away.

WBCN and the American Revolution

How a Radio Station Defined Politics, Counterculture, and Rock and Roll *MIT Press*

How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battered down. But that changed the following year, when a Harvard Law School graduate student named Ray Riepen founded a radio station that played music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN, creativity and countercultural politics ruled: there were no set playlists; news segments anticipated the satire of The Daily Show; on-air interviewees ranged from John and Yoko to Noam Chomsky; a telephone “Listener Line” fielded questions on any subject, day and night. From 1968 to Watergate, Boston’s WBCN was the hub of the rock-and-roll, antiwar, psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and scenes of joyousness on Boston CommonInterwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the “news dissector” Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein’s documentary WBCN and the American Revolution is available as a DVD sold separately.
