3X3. Sum = 15. One of the possible solutions. A magic square of size nXn is an arrangement of numbers from 1 to n² such that the sum of the numbers in each row, column and diagonal is the same. Each cell in a nXn grid has a different number and the numbers range from 1 to n².

Magic Square

The reason there are only these 3x3 magic squares is simple enough. First of all, since each row must add up to the same number, there are three rows, and 1+2+3+4+5+6+7+8+9 is 45, Each row must add up to 45 / 3, that is, 15. Next, if you add the two diagonals and the middle column, you'll get 15+15+15=45 again. On the other hand, this is the same as adding the top row, the

bottom row, and three times the middle number, so this is 15+15+middle+middle+middle.
