The Psychology of Job Interviews Routledge

Most people, at some point in their lives, experience the stress of being interviewed for a job they want. Many also face the challenge of interviewing other people. But what does the science tell us about this unique social situation? What biases are involved, and how can we become aware of them? And how can job interviews be structured so that they are fair and effective? The Psychology of Job Interviews is the first book to provide an accessible and concise overview of what we know. Based on empirical research rather than second hand advice, it discusses the strategies and tactics that both applicants and interviewers can use to make their interviews more successful; from how to make a good first impression to how to decide which candidate is the best fit for the role. Illustrated with examples throughout, the book guides job applicants on how best to prepare for and perform in an interview, and provides managers with best-practice advice in selecting the right candidate. Debunking several popular myths along the way, this is essential reading for anyone interested in understanding what is really happening in a job interview, whichever side of the desk you are sitting.

Exploring Teacher Recruitment and Retention

Contextual Challenges from International Perspectives Routledge

Police Selection and Training**The Role of Psychology** *Springer Science & Business Media*

The New Police Officer During the past twenty years the tasks required of police officers have expanded and changed with dramatic rapidity. The traditional roles of the police had been those of law enforcement and the maintenance of public order. As a consequence police officers were typically large-bodied males, selected for their physical abilities and trained to accept orders and enforce the law. Over the past two decades, however, the industrialized nations have placed a variety of new demands on police officers. To traditional law enforcement and public order tasks have been added social work, mental health duties, and community relations work. For example, domestic disputes, violence between husbands and wives, lovers, relatives, etc. , have increased in frequency and severity (or at least there has been a dramatic increase in reporting the occurrence of domestic violence). Our societies have no formal system to deal with domestic disputes and the responsibility to do so, in most countries, has fallen to the police. In fact, in some areas as many as 60% of calls for service to the police are related to domestic disputes (see the chapter in this text by Dutton). As a result the police officer has had to become a skilled social worker, able to intervene with sensitivity in domestic situations. Alternatively, in the case of West Germany, the officer has had to learn to work co-operatively with social workers (see the chapter by Steinhilper).

Strategic Compensation in Canada *Thomson Nelson***Recruitment and Selection of Immigrant Professionals in Canada****A Case Study**

As Canada continues to move towards a high-skilled knowledge economy, immigrant professionals are necessary to fill the shortfall of required workers. This study is designed to answer important conceptual and practical questions about the reasons for a gap between an organization's goal to hire immigrant professionals and the actual outcome. Utilizing a case study of three multinational corporations, all recipients of Canada's Best Diversity Employer award, 18 informants were interviewed. These informants included recruiters and hiring managers working across Canada, holding positions of junior manager to executive. By analyzing the organizations' recruitment and selection processes, a better understanding of what strategic human resource management (SHRM) systems lead to immigrant professional hiring has been gained. Focusing on vertical and horizontal linkages under a configurationally SHRM theory, it is evident that implementation of a holistic process is fundamental to improving recruitment and selection of immigrant professionals outcomes. This research adds to the body of work of SHRM by applying a micro perspective and provides recommendations for practical applications.

International Handbook of Educational Leadership and Administration *Springer Science & Business Media*

EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters. A synopsis of the contents of those chapters is also provided. SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail. After all, there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years. Such a view is captured, for example, in Bennis' observation that: Of all the hazy and confounding areas in social psychology, leadership theory undoubtedly contends for top nomination. Probably more has been written and less is known about leadership than any other topic in the behavioural sciences. (1959, page 259) We do not find this state of affairs discouraging (nor entirely accurate) and, of course, it did not prevent Bennis from proceeding either. One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory, a theory which applies to all or most domains of organized human activity. This aspiration inevitably produces decontextualized and, therefore, abstract categories of practice. Howard Gardner's (1995) depiction of leadership as story telling is a case in point.

Instructor's Resource CD to Accompany Recruitment and Selection in Canada, Fifth Edition [by] Victor M. Catano, Willi H. Wiesner, Rick D. Hackett**Police Powers in Canada****The Evolution and Practice of Authority** *University of Toronto Press*

The television spectacles of Oka and the Rodney King affair served to focus public disaffection with the police, a disaffection that has been growing for several years. In Canada, confidence in the police is at an all-time low. At the same time crime rates continue to rise. Canada now has the dubious distinction of having the second highest crime rate in the Western world. How did this state of affairs come about? What do we want from our police? How do we achieve policing that is consistent with the Charter of Rights and Freedoms? The essays in this volume set out to explore these questions. In their introduction, the editors point out that constitutional order is tied to the exercise of power by law enforcement agencies, and that if relations between the police and civil society continue to erode, the exercise of force will rise - a dangerous prospect for democratic societies.
