Physical security is the most fundamental aspect of protection. It is the use of physical controls to protect the premises, site, facility, building, or other physical assets belonging to IWC. The application of physical security is the process of using layers of physical protective measures to prevent unauthorized access, harm, or destruction of property.

Fundamental Principles of Physical Security • Security.land

Your physical security should incorporate surveillance cameras and sensors that track movements and changes in the environment, especially after hours. You also need to install proper security lighting to ensure all monitored areas are visible at any given moment.
