These measurements are usually much smaller than the number of samples that define the signal. From these small numbers of measurements, the signal is then reconstructed by non-linear procedure. Compressed sensing has recently emerged as a powerful tool for efficiently processing data in non-traditional ways. In this book, we highlight some of the key mathematical insights underlying sparse representation and compressed sensing and illustrate the role of these theories in classical vision, ...

Compressed sensing exploits the fact that many signals are naturally sparse, or have a sparse representation on a given basis. In other words, this concept establishes that most of the energy from a signal is concentrated in either a small portion of its elements or its coefficients on a representation basis.

Structural Group Sparse Representation for Image Compressive Sensing Recovery. Abstract: Compressive Sensing (CS) theory shows that a signal can be decoded from many fewer measurements than suggested by the Nyquist sampling theory, when the signal is sparse in some domain. Most of conventional CS recovery approaches, however, exploited a set of fixed bases (e.g. DCT, wavelet, contour let and gradient domain) for the entirety of a signal, which are irrespective of the nonstationarity of ...

Abstract: Compressive Sensing (CS) is a new sensing modality, which compresses the signal being acquired at the time of sensing. Signals can have sparse or compressible representation either in original domain or in some transform domain. Relying on the sparsity of the signals, CS allows us to sample the signal at a rate much below the Nyquist sampling rate.

Compressed sensing is a new signal processing method that can relax the Shannon/Nyquist sampling significantly for signals that is sparse or compressible over a set of basis. Because the dominant modes at a certain blade-passing frequency are usually sparse [9], it is very promising that compressed sensing method can be used to reduce the number of sampling rate, i.e., the number of sensors, significantly.
