Drawing with TeX There are many packages to do pictures in (La)TeX itself (rather than importing graphics created externally), ranging from simple use of LaTeX picture environment, through enhancements like eepic, to sophisticated (but slow) drawing with PicTeX. Depending on your type of drawing, and setup, here are a few systems you may consider:

Drawing with TeX | The TeX FAQ
Grids. Very often when drawing diagrams we will want to draw a grid. To do this we use the \draw command followed by by some additional arguments. For example, we specify the grid step size using step= and a length. We've also specified the colour gray and told it to make the lines very thin.After these arguments we enter the co-ordinates of the bottom-left corner, followed by the keyword grid ...
