Anatomy, Physiology News, Articles | The Scientist Magazine®

Anatomy and physiology are two related biology disciplines. Many college courses teach them together, so it's easy to be confused about the difference between them. Simply put, anatomy is the study of the structure and identity of body parts, while physiology is the study of how these parts function and relate to one another.

Difference Between Anatomy and Physiology

Introduction to Anatomy and Physiology. Anatomy is the study of the structure of the human body. Physiology deals with the study of the function of the human body. There are two levels of study:

microscopic and macroscopic. 1.

Microscopic anatomy – dealing with the study of structures only viewable with a microscope (cellular level).. 2.

Macroscopic anatomy (also referred to as gross anatomy ...
