Time-Saver Standards for Building Types: 3rd Edition
The 1st Edition of Time-Saver Standards for Building Types has been an important part of my professional library since its publication in 1973. As stated in its preface: "It is intended to give basic design criteria for each major type of building. It will give those unfamiliar with a specific building type a talking or working knowledge of its functions, organization, and major components." Over the years, I have referred to Time-Saver frequently for planning and design guidelines for building types such as gymnasiums, airport terminals, and police stations. But as the 1st Edition is now 17 years old and much of it is based on other even older versions of Time-Saver Standards, I have begunto find the book inadequate for contemporary design practice.The past two decades have been a period of profound change for building planning and design. Many building requirements have changed and entire new categories of buildings have evolved. It was with enthusiasm that I looked forward to the 3rd Edition; which the publisher promised would be "revised, expanded, and completely brought up to date." I am greatly disappointed with the result. While the 3rd Edition has been expanded to approximately 1400 pages, nearly a third more than the 1st Edition, little of the original material has been revised and the updating has been insufficient.

Time-Saver Standards For Building Materials & Systems: Design Criteria And Selection Data *Tata McGraw-Hill Education*
An important addition to the Time-Saver Standards Series, this book offers top-flight guidance for architects and builders who need to select any type of product, system, component, material, or assembly for any job. Provides easy-to-understand guidance on how various materials function, considers key issues in product selection, and offers general information on the full range of product types. Organized by CSI MasterFormat--the product specification system most commonly used in construction and in the Sweet's catalogs. Cross-referenced to the UniFormat system, which indexes products by the sequence of assembly in design and construction--a real plus when engaged in preliminary design and cost-estimating.

Time-Saver Standards for Architectural Design : Technical Data for Professional Practice *McGraw-Hill Prof Med/Tech*
Since its release in 1946, this has been one of the most widely recognized and respected resources for architects, engineers, and designers, bringing together the knowledge, techniques, and skills of some of the most well-known experts in the field. The new Eighth Edition takes a fresh, visual approach to the information architects need to access quickly, helping them save time and money by assuring they get it right the first time. Readers will find timely, new chapters on building security, natural disaster mitigation, building diagnostics, facility management, and much more. The accompanying CD-ROM contains the complete contents of the Eighth Edition.

Time Saver Std For Landscape Archi

The site design and construction reference of the design professions. Newly designed and containing 40 percent completely new content, Time-Saver Standards for Landscape Architecture, Second Edition, continues to be the most complete source of site construction standards and data for the design and planning professions and related academic disciplines. It maintains and enhances its emphasis on promoting environmentally suitable techniques, processes, and materials aimed at mitigating the impact of construction intervention. This essential and comprehensive Second Edition not only covers the major changes that have occurred in the last decade, it also serves as a framework for future trends. It is fully metric, to meet Federal and International requirements, with expanded coverage of handicapped access and human dimensional standards. Time-Saver Standards for Landscape Architecture, Second Edition, features increased coverage of: site storm water "best management" practices; new urban tree planting and xeriscape concepts; earth retaining structures and pavement design; land reclamation, including soil and vegetation restoration; metric site layout practices, including recreation facilities; energy and resource conservation; natural processes and site construction procedures; new expanded construction details; simplified construction materials data. In the time honored tradition of Time-Saver Standards, this Second Edition combines the expertise of over 200 design professionals to create a working resource for all who plan, design, manage, and build human landscapes. Over 50 sections provide concise tables, checklists, "Key Point" text summaries, and illustrations to provide an invaluable information resource for offices and classrooms throughout the world.

Human Dimension and Interior Space *Watson-Guptill*

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Space Planning Basics *John Wiley & Sons*

Space planning involves much more than sketching a preliminary floor plan. A designer must take a client's programming needs into account and must also consider how other factors such as building codes and environmental factors affect a spatial composition. Space Planning Basics, now in its Third Edition, offers a highly visual, step-by-step approach to developing preliminary floor plans for commercial spaces. The book provides tools for visualizing space and walks the designer through other considerations such as building code requirements and environmental control needs. Specific programming techniques covered include matrices, bubble diagrams, CAD templates, block plans, and more. New to this edition are coverage of the basics of stair design, an essential aspect for

planning spaces.

Mind Tools for Managers *John Wiley & Sons*

The manager's must-have guide to excelling in all aspects of the job Mind Tools for Managers helps new and experienced leaders develop the skills they need to be more effective in everything they do. Each chapter details a related group of skills, providing links to additional resources as needed, plus the tools you need to put ideas into practice. Read beginning-to-end, this guide provides a crash course on the essential skills of any effective manager; used as a reference, its clear organization allows you to find the solution you need quickly and easily. Success in a leadership position comes from results, and results come from the effective coordination of often competing needs: your organization, your client, your team, and your projects. These all demand time, attention, and energy, and keeping everything running smoothly while making the important decisions is a lot to handle. This book shows you how to manage it all, and manage it well, with practical wisdom and expert guidance. Build your ideal team and keep them motivated Make better decisions and boost your strategy game Manage both time and stress to get more done with less Master effective communication, facilitate innovation, and much more Managers wear many hats and often operate under a tremendously diverse set of job duties. Delegation, prioritization, strategy, decision making, communication, problem solving, creativity, time management, project management and stress management are all part of your domain. Mind Tools for Managers helps you take control and get the best out of your team, your time, and yourself.

Architects' Data *Wiley-Blackwell*

This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Conditional Design *BIS Publishers*

Conditional design is the sequel to Operative Design. This book will further explore the operative in a more detailed, intentional, and perhaps functional manner. Spatially, the conditional is the result of the operative. It is not a blind result however. Both terms work together to satisfy a formal manipulation through a set of opportunities for elements such as connections and apertures.

A World History of Architecture *McGraw-Hill Education*

A magnificently illustrated guide to the global history of architecture—updated to include the non-western world and works from women The Second Edition of this historical architectural guide gives you a deeper knowledge and wider perspective of traditions in architecture throughout the world—from prehistoric through modern structures. Extensively and beautifully illustrated, the book includes photos, plans, scales for world-famous structures such as the Parthenon, Versailles, the Brooklyn Bridge, and many others.
