The first power you'll want to check for is the constant 12V wire, so set your multimeter to the appropriate scale, connect the ground lead to a known good ground, and touch the other lead to each wire in the speaker wire. When you find one that shows approximately 12V, you have found the constant 12V wire, which is also referred to as the memory wire.

Generally, when installing a new car

stereo into your vehicle you'll need an aftermarket wiring harness that clips onto the factory harness you pulled off of the back of your factory radio during its removal. This wiring harness adapter that you need is specific to the year, make and model of your vehicle. The cool thing is that it also follows the same CEA wiring color codes that are shown in the picture above. So all you need to do is to connect them by matching them color to color.

Navigation. The easiest way to wire in an aftermarket car stereo is to look at car stereo wiring diagrams for the specific vehicle and

head unit, but it's actually possible to get the job done without any labels, adapters, or diagrams. The reason you usually don't actually need a wiring diagram to install a car stereo, even if it's a second-hand unit that didn't come with any paperwork, is that aftermarket car stereo wire colors are actually pretty uniform.
