Mathematically, a system dynamics simulation model maps to a system of differential equations that are solved numerically in a simulation engine. System dynamics modeling in AnyLogic AnyLogic supports the design and simulation of feedback structures such as, stock and flow diagrams, array variables (subscripts) in a way most system dynamics modelers are familiar.

System Dynamics - AnyLogic Simulation Software

A system dynamics model is built to understand a system of forces that have created a “problem” and continue to sustain it. To have a meaningful model, there must be some underlying problem in a system that creates a need for additional knowledge and understanding of the system. The goal of the conceptualization stage is to arrive at a
