Intellectual Property And Climate Change

Climate Change and Intellectual Property Addressing climate change is dependent on economic growth that works with, rather than against the environment. Innovative green technology solutions can help by allowing us to do more with less – be it alternative energy production, energy saving, or greener forms of transportation, agriculture and forestry.

Climate Change and Intellectual Property

It explores possible ways to increase the role of IP in addressing climate change issues, including limiting the availability of patents, fast-tracking certain patent applications, and promoting IP exploitation models based on sharing rather than control.

'A valuable assessment of the limits and strengths of the international intellectual property rights framework in addressing the climate change threat through technological innovation.

Intellectual Property Rights and

Climate Change by Wei Zhuang

Technology is one way of addressing, responding to and seeking to manage climate change. This can be seen in international instruments, national legislation and policy activity. Yet technology is often developed as a result of private sector innovation and creativity; and it may be the subject of intellectual property ('IP') rights.
