Morphing is the act of changing one shape into another. Shapes can morph in response to changes in state or content, or as a result of user interaction. For example, when rotating a mobile device from portrait to landscape, surfaces can respond by changing size, which can cause shapes to morph. Shapes can morph for various reasons, such as to remain consistent with a visual language as surface dimensions change, or to indicate when items are added to a selected set.

Shape and Motion - Material Design

Sometimes the only thing keeping your motion design from being over the top is a simple shape element.While these elements are usually pretty easy to create, it’s still great to have some simple pre-rendered elements to drop into your project..
