Siemens observes standard data protection principles, in particular the principle of privacy by design. That means that this product does not process / store any personal data, only technical functional data (e.g. time stamps). If a user links this data with other data (e.g. a shift schedule) or stores personal data on the same storage medium (e.g. hard drive) and thus establishes a link to a ...

The ZEUS is an ultra-low power, high performance, single board computer based on the PXA270 processor. The PXA270 is an implementation of the Intel XScale micro architecture, combined with a comprehensive set of integrated peripherals including: • Flat panel graphics controller. • Interrupt controller. • Real time clock.

EPIC Single Board Computer - Support

The PMI contains the site specific program as developed in the Zeus programming tool. All system logic and supervision is provided by the controller in the PMI. The PMI and the Zeus programming tool require compatible firmware/software. The tool will give a warning if the user attempts to use incompatible software to configure a system.
