A structural engineer should determine if a secondary structural system is required based on the design loads. To date, the tallest structure constructed exclusively of SIPs is four stories. Taller structures are possible; however, design limitations are due to the fact that SIPs are bearing walls and therefore open spaces at lower floors are more difficult to achieve.

Structural insulated panels, or SIPs, are durable panels for building, with high performance insulation and energy efficiency qualities. You can build with SIPs to ensure a sustainable and environmentally friendly project, as structural insulated panels are designed to reduce energy consumption, conserve resources, and generate a healthy environment, free from mould issues or airborne pollutants.

SIPS UK - Structural Insulated Panels Manufacturers
One design element that SIPs do lend themselves especially well to is creating spacious living areas in lofts, thanks to their strength and insulation performance in a relatively lean panel thickness. “If you have paid good money for a plot of land, why would you put roof trusses in?” asks Andy.
