Environmental psychology is a subfield of psychology that, as the definition above suggests, deals with how people interact and engage with their surroundings. Its roots reach far back, but as an established field it is relatively young (Spencer & Gee, 2009). You could say it started all the way back in the late 1200s.

What is Environmental Psychology? - PositivePsychology.com

Introduction individuals' Environmental psychology is the study of how we, as individuals and as part of groups, interact with our physical settings—how we experience and change the

environment, and how our behavior and experiences are changed by the environment. In environmental psychology, “environment” includes
