Lithographic printing, accounting for about 46% of the market, includes heatset (oil-based inks used mainly for commercial printing but also for package printing), coldset (oil-based inks used mainly for newspapers, flyers, and magazines), conventional sheetfed (oil-based inks used mainly for commercial printing and publication but also for package printing), and oil-based overprint varnishes.

Printing Inks - Specialty Chemicals Update Program (SCUP ...

The ink is controlled in the flexographic printing process by the ink system. The ink system contains an ink pump, anilox roll and either a fountain roll system or doctor blade system. The fountain roll or two-roll system has one roll spinning in an ink pan pressed against the anilox roll to transfer a layer of ink to then be applied to the printing plate.

Flexography - Wikipedia

The costs of chemicals needed for the production of printing inks are at an all-time high. During 2010 and 2011 raw material prices, especially for binders and pigments, went up by more than 10 % per quarter. Over the two year period these two categories faced an 80% price increase from raw material suppliers.
