Product Description. In this resource, students will observe competitive exclusion principle by virtually culturing *P. aurelia* and *P. caudatum* in separate pure samples as well as in a mixed sample. Students will also be required to analyze concepts based on competition as well as label and identify carrying capacity, exponential growth, transitional phase, and death phase.

Competition between *Paramecium* species. The fourth example comes from the classic work of the great Russian ecologist G. F. Gause, who studied competition in laboratory experiments using three species of the protozoan *Paramecium* (Gause, 1934, 1935). All three species grew well alone, reaching stable carrying capacities in tubes of liquid medium.
