environmental psychology an interdisciplinary perspective

Environmental psychology is an interdisciplinary field that focuses on the interplay between individuals and their surroundings. It examines the way in which the natural environment and our built environments shape us as individuals. The field defines the term environment broadly, encompassing

natural environments, social settings, built environments, learning environments, and informational environments. Environmental psychology was not fully recognized as its own field until the late 1960s when

Environmental psychology - Wikipedia

Environmental Psychology. Environmental psychology is an interdisciplinary field that attempts to study the interplay between environment and psychology. The term "environment" here is often used somewhat loosely, and environmental psychologists might study a broad range of topics, such as how architecture affects behavior, how environment in the sense of family life or neighborhood culture affects behavior, or even how city planning on the macro scale can affect behavior.
