The Integumentary System: Exercise 7 Pre lab Quiz ...

The integumentary system refers to the skin and its accessory structures, and it is responsible for much

more than simply lending to your outward appearance. In the adult human body, the skin makes up about 16 percent of body weight and covers an area of 1.5 to 2 m². In fact, the skin and accessory structures are the largest organ system in ...

The Integumentary System | Anatomy and Physiology I

The skin and its accessory structures make up the integumentary system, which provides the body with overall protection. The skin is made of multiple layers of cells and tissues, which are held to underlying structures by connective tissue (Figure 4.1). The deeper layer of skin is well vascularized (has

numerous blood vessels).

4: The Integumentary System - Medicine LibreTexts

...The Integumentary System The Integumentary System, consisting of the skin, hair and nails, act as a barrier to protect the body from the outside world. It also has several other functions in the body. The word INTEGUMENT comes from a Latin word that means to cover. The most important function of the integumentary system is protection. This system 1) serves as a barrier against infection and ...
