When Dewey Andreas uncovers the identity of a mole embedded at a high level in Israel's Mossad, it triggers a larger, more dangerous plot. The mole was the most important asset of Chinese Intelligence, and Fao Bhang, head of China's Ministry of State Security (MSS), responds to the discovery and brutal elimination of the mole, by immediately placing a kill order on the man responsible—Dewey Andreas. Dewey is tracked to Argentina, where he is on vacation with his fiancée, Jessica Tanzer, a U.S. National Security Advisor. A top-level kill team is sent in quickly and quietly, but their attack fails to take out Dewey. The collateral damage, however, is both horrifying and deeply personal. With nothing left to lose, Andreas is determined to have his revenge. Once he learns who is probably behind the attack—and why they are after him—Dewey goes rogue, using all of his assets and skills to launch a counterattack. Andreas must now face the full weight and might of the MSS, Chinese Intelligence, and the formidable Fao Bhang, if he's to achieve his one last goal: revenge on a biblical scale, no matter the odds or the armies that he will have to fight his way through. Eye for an Eye *Forge Books*

When the criminal who attacked her daughter is released from jail, former business executive Karen Newman joins a vigilante group that systematically hunts down criminals nationwide. Reprint. Movie tie-in.

Eye for an Eye *Cambridge University Press*

This book is a historical and philosophical meditation on paying back and buying back, that is, it is about retaliation and redemption. It takes the law of the talion - eye for an eye, tooth for a tooth - seriously. In its biblical formulation that law states the value of my eye in terms of your eye, the value of your teeth in terms of my teeth. Eyes and teeth become units of valuation. But the talion doesn't stop there. It seems to demand that eyes, teeth, and lives are also to provide the means of payment. Bodies and body parts, it seems, have a just claim to being not just money, but the first and precisest of money substances. In its highly original way, the book offers a theory of justice, not an airy theory though. It is about getting even in a toughminded, unsentimental, but respectful way. And finds that much of what we take to be justice, honor, and respect for persons requires, at its core, measuring and measuring up.

An Eye for an Eye

A Global History of Crime and Punishment *Reaktion Books*

From “an eye for an eye” to debates over capital punishment, humanity has a long and controversial relationship with doling out justice for criminal acts. Today, crime and punishment remain significant parts of our culture, but societies vary greatly on what is considered criminal and how it should be punished. In this global survey of crime and punishment throughout history, Mitchel P. Roth examines how and why we penalize certain activities, and he scrutinizes the effectiveness of such efforts in both punishing wrongdoers and bringing a sense of justice to victims. Drawing on anthropology, archaeology, folklore, and literature, Roth chronicles the global history of crime and punishment—from early civilizations to the outlawing of sex crimes and serial homicide to the development of organized crime and the threat today of global piracy. He explores the birth of the penitentiary and the practice of incarceration as well as the modern philosophy of rehabilitation, arguing that these are perhaps the most important advances in the effort to safeguard citizens from harm. Looking closely at the retributions societies have condoned, Roth also look at execution and its many forms, showing how stoning, hemlock, the firing squad, and lethal injection are considered either barbaric or justified across different cultures. Ultimately, he illustrates that despite advances in every level of human experience, there is remarkable continuity in what is considered a crime and the sanctions administered. Perfect for students, academics, and general readers alike, this interdisciplinary book provides a fascinating look at criminality and its consequences.

Were these purveyors of death sent from the Devil himself? Will Dasher risk it all...one...last...time? Forget what you know about New York Times Best Selling, vaguely Christian, psychological crime thrillers. An Eye for an Eye and Your Other Eye and the Rest of Your Family will have you questioning virtually everything about your own life. "Baldacci has penned a scathing commentary on today's America and masked it as a pseudo-religious, mind-destorying crime thriller replete with horrifying descriptions of things that only appear in a psychopath's darkest nightmares" -Anonymous Amazon Reviewer

In the Blink of an Eye

A Cultural History of Spectacles *Reaktion Books*

From monocles to pince-nez and goggle-eyes, a cultural and technological history of glasses in fact and fiction. This book examines those who wore glasses through history, art, and literature, from the green emerald through which Emperor Nero watched gladiator fights to Benjamin Franklin's homemade bifocals, and from Marilyn Monroe's cat-eye glasses to the famed four-eyes of Emma Bovary and Harry Potter. Spectacles are objects that seem commonplace, but In the Blink of an Eye shows that because they fundamentally changed people's lives, glasses were the wellspring of a quiet social, cultural, and economic revolution. Indeed, one can argue that modernity itself began with the paradigm shift that transformed poor eyesight from a severely limiting disease—treated with pomades and tinctures—into a minor impairment that can be remedied with mechanisms constructed from lenses and wire.

The Immorality of Punishing by Death *Rowman & Littlefield*

The death penalty issue has become the epitome of the unresolvable issue, the question which people answer on the basis of gut reactions rather than logical arguments. In the second edition of An Eye for an Eye? Stephen Nathanson evaluates arguments for and against the death penalty, and ultimately defends an abolitionist position to the controversial practice, including arguments that show how and why the death penalty is inconsistent with respect for life and a commitment to justice. A timely new postscript and an updated bibliography accompany the volume.

An Eye for Art

Focusing on Great Artists and Their Work *Chicago Review Press*

Lavishly illustrated with 230 full color images, this family-oriented art resource introduces children ages 7 to 12, as well as their parents and educators, to more than 50 great artists and their work, with corresponding activities and explorations that inspire artistic development, focused looking, and even creative writing. Thematic chapters range from examining portraiture and landscape to playing with space and storytelling. Within each chapter a diverse range of American and European artists, art mediums, and time periods is represented. This treasure trove of artwork from the National Gallery of Art includes, among others, works by Raphael, Rembrandt, Georgia O'Keeffe, Henri Matisse, Chuck Close, Jacob Lawrence, Pablo Picasso, and Alexander Calder, representing a wide range of artistic styles and techniques. Written by museum educators with decades of hands-on experience in both art-making activities and making art relatable to children, the activities include sculpting a clay figure inspired by Edgar Degas; drawing an object from touch alone, inspired by Joan Miro's experience as an art student; painting a double-sided portrait with one side reflecting physical traits and the other side personality traits, inspired by Leonardo da Vinci's Ginevra de'

Benci; and creating a story based on a Mary Cassatt painting. Educators, homeschoolers, and families alike will find their creativity sparked by this art extravaganza. The National Gallery of Art in Washington, DC, maintains one of the world's most renowned collections of American and European masterpieces from the thirteenth century to the present. An important component of the National Gallery of Art is its educational mission. This book was written and compiled by the museum's educators and is a collective effort of the Education Division at the National Gallery of Art.

The Code of Hammurabi

The Code of Hammurabi is a well-preserved Babylonian law code of ancient Mesopotamia, dating back to about 1754 BC. It is one of the oldest deciphered writings of significant length in the world. The sixth Babylonian king, Hammurabi, enacted the code, and partial copies exist on a man-sized stone stele and various clay tablets. The Code consists of 282 laws, with scaled punishments, adjusting "an eye for an eye, a tooth for a tooth" (lex talionis) as graded depending on social status, of slave versus free man. Nearly one-half of the Code deals with matters of contract, establishing, for example, the wages to be paid to an ox driver or a surgeon. Other provisions set the terms of a transaction, establishing the liability of a builder for a house that collapses, for example, or property that is damaged while left in the care of another. A third of the code addresses issues concerning household and family relationships such as inheritance, divorce, paternity, and sexual behavior. Only one provision appears to impose obligations on an official; this provision establishes that a judge who reaches an incorrect decision is to be fined and removed from the bench permanently. A few provisions address issues related to military service. Hammurabi ruled for nearly 42 years, c. 1792 to 1750 BC according to the Middle chronology. Twelve Red Herrings *St. Martin's Paperbacks*

Jeffrey Archer, the internationally bestselling author of *Honor Among Thieves*, *As The Crow Flies*, and *Kane & Abel*, now serves up this inventive new collection of a dozen short stories -- with a twist. Cleverly styled, with richly drawn characters and ingeniously plotted story lines, each of the twelve pieces ends with a delightfully unexpected turn of events. An imprisoned man is certain that his supposed murder victim is very much alive....A female driver is pursued relentlessly by a menacing figure in another vehicle....A young artist gets the biggest break of her career....A restless beauty manages the perfect birthday celebration....An escaped Iraqi on Saddam Hussein's death list pays an

involuntary visit to his homeland. In each tale, human beings are given an opportunity to seize, a crucial problem to solve, or a danger to avoid. How will they react? How would you? Capping off the collection are two additional rewards. In the final story, Archer offers a choice of four endings. And buried in each story is another diversion -- a red herring which Archer challenges his readers to uncover.

But a young detective constable, Leonard Corell, who once dreamed of a career in higher mathematics, suspects greater forces are involved. In the face of opposition from his superiors, he begins to assemble the pieces of a puzzle that lead him to one of the most closely guarded secrets of the war: the Bletchley Park operation to crack the Nazis' Enigma encryption code. Stumbling across evidence of Turing's genius, and sensing an escape from a narrow life, Corell begins to dig deeper. But in the paranoid, febrile atmosphere of the Cold War, loose cannons cannot be tolerated and Corell soon realizes he has much to learn about the dangers of forbidden knowledge. Eye for Detail

Images of Plants and Animals in Art and Science, 1500-1630 *Reaktion Books*

Image-transforming techniques such as close-up, time lapse and layering are often linked to the age of photography, but they were already being used half a millennium ago for the purposes of identification and study. This is why Renaissance drawings of plants and animals are immediately recognizable to the modern viewer. Discussing natural history images made throughout Europe during the sixteenth century, Eye for Detail traces the early history of image manipulation

techniques. Florike Egmond shows how the roles and formats of images in nature study changed dramatically during this period, as high-definition naturalistic representation became the rule, and large image collections of plants and animals were created for identification and illustration. She investigates what the use of visual techniques like magnification can tell us about how early modern Europeans studied and ordered living nature, and focuses on how attention to visual detail reveals the overriding question that continued to occupy the minds of naturalists from antiquity well into the modern age: the secret of how life originates. Featuring many striking colour illustrations that have never been published before, this beautiful volume is an arresting guide to the large Continental collections of naturalia drawings and an absorbing study of natural history art of the sixteenth century.
